Ring Banded Gastric Bypass

The New Standard for Bariatric Surgery

Banded Roux-en-Y GBP

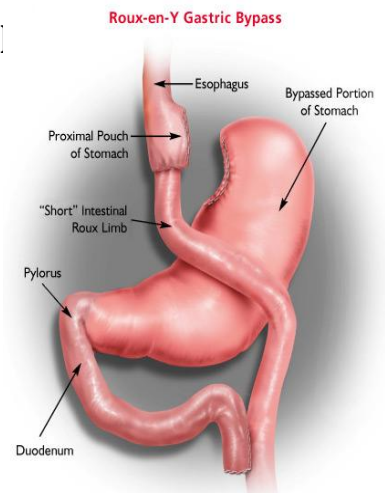

GaBP Ring™ Designed for banding the pouch in the Gastric Bypass and gastroplasty operations. Prefabricated, Standardized, Sterilized and available in 4 sizes
Patent US. 7,909,839 B2

CE Mark # 1011401

FDA ID:

Is the gold standard of Weight Loss Surgery

Reports show that 15- 25% of patients do not achieve successful weight loss in the short term, 1-3yrs after the operation.

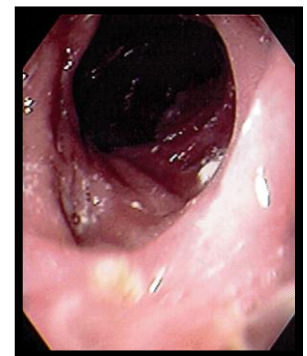

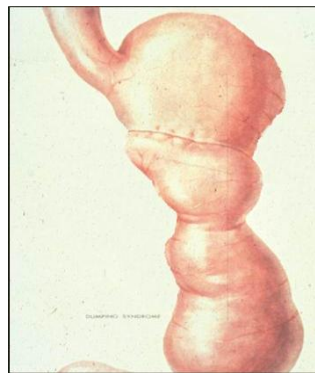

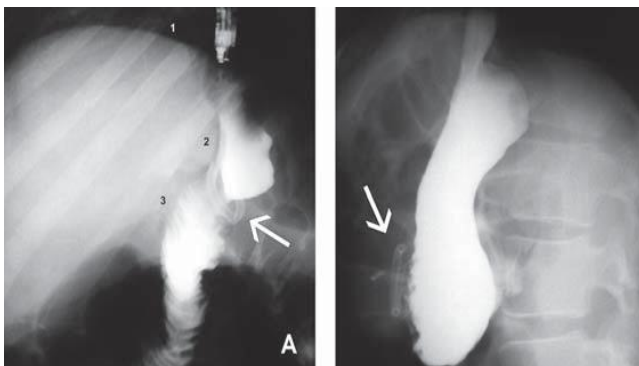

Reports also show that this rate increases to 25-40% in patients followed longer than three years because of weight regain.

The inadequate weight loss and weight regain observed in the gastric bypass operation have been attributed mostly to the increase in the gastric reservoir size due to dilatation of the pouch, stoma and the proximal small bowel.

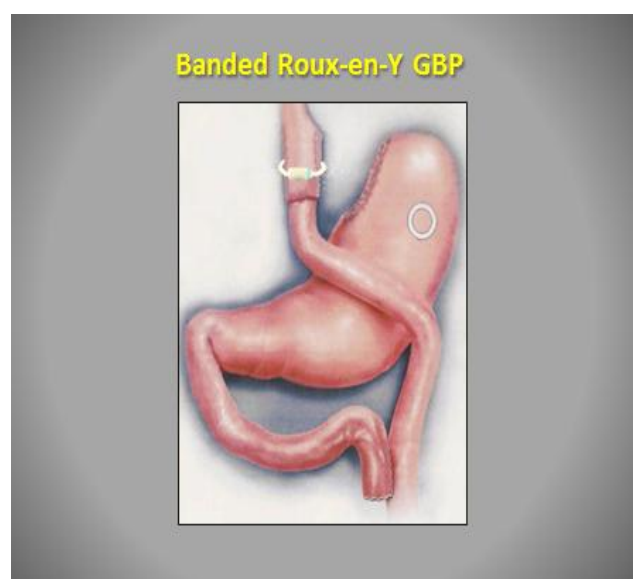

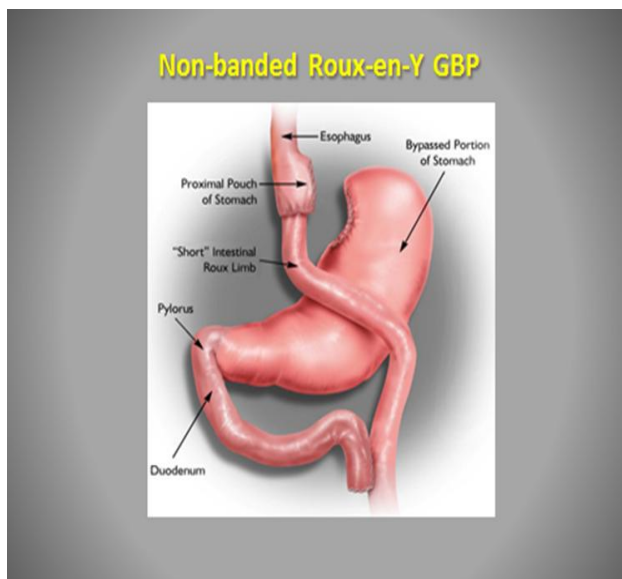

The dilated stoma converts the pouch and the proximal small bowel into a neo-pouch that can accommodate as much as the initial stomach. This will result in inadequate weight loss and weight regain after gastric bypass operation.

Non-Banded dilated stoma and proximal Small bowel become part of neo-pouch

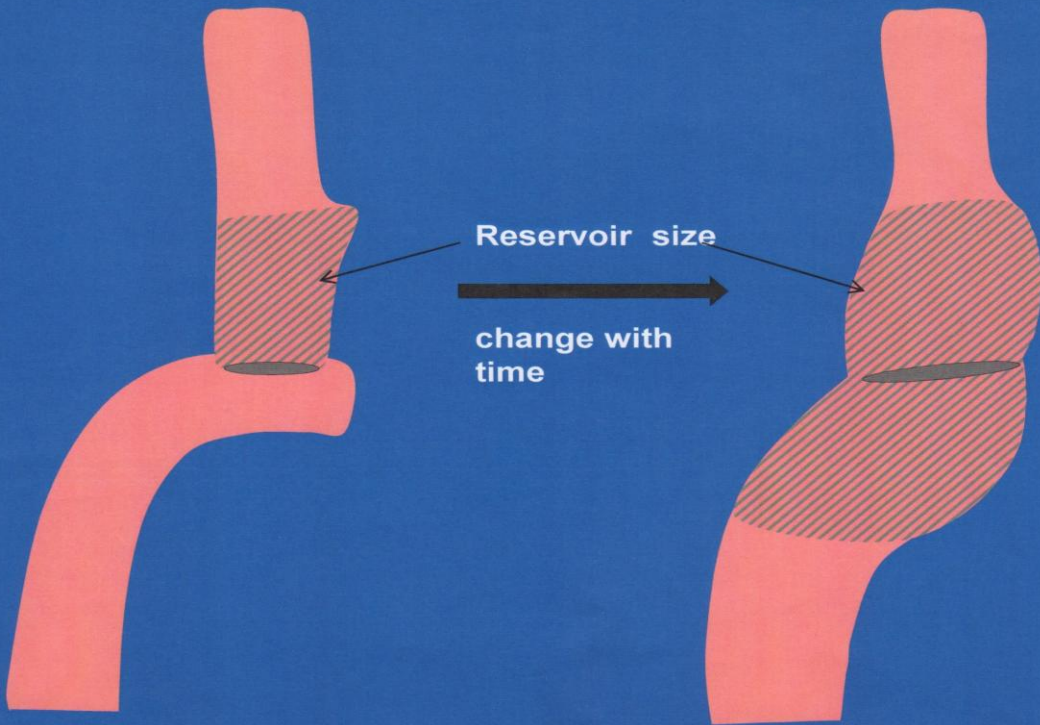

Banded vs. Non banded Gastric Bypass

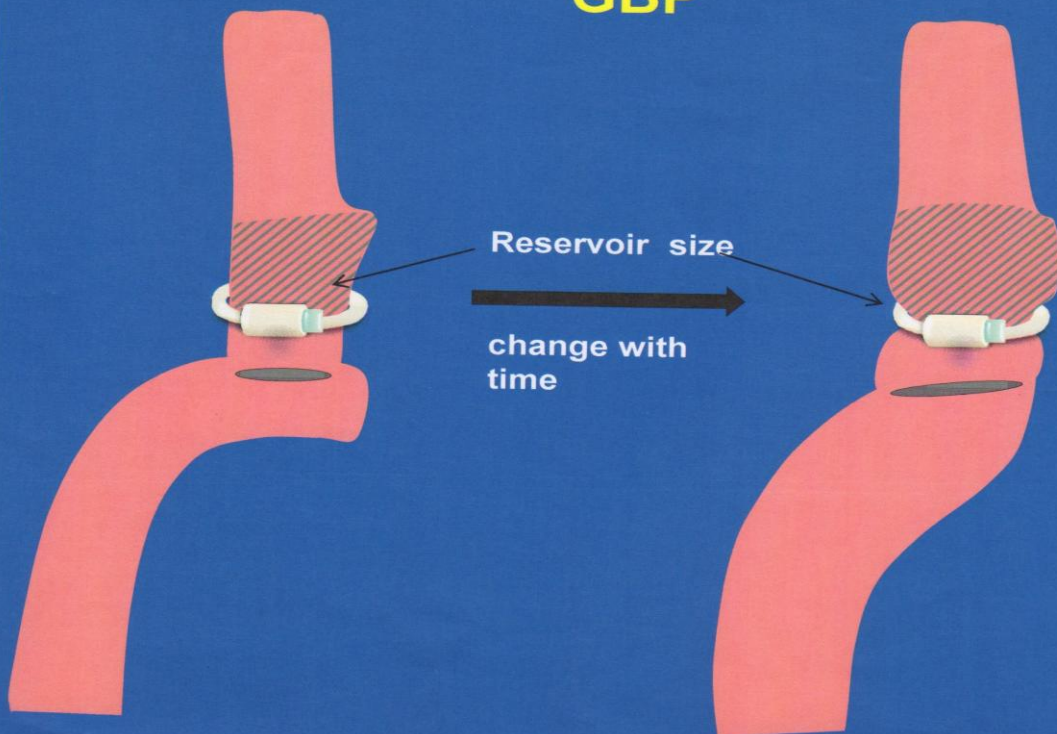

Placement of a band or ring (GaBP Ring™ device) around the pouch to function as the stoma has been shown to slow down passage through the pouch, stabilize the pouch and stoma sizes and prevent the development of the large gastric Reservoir.

Non-banded Roux-en-Y GBP

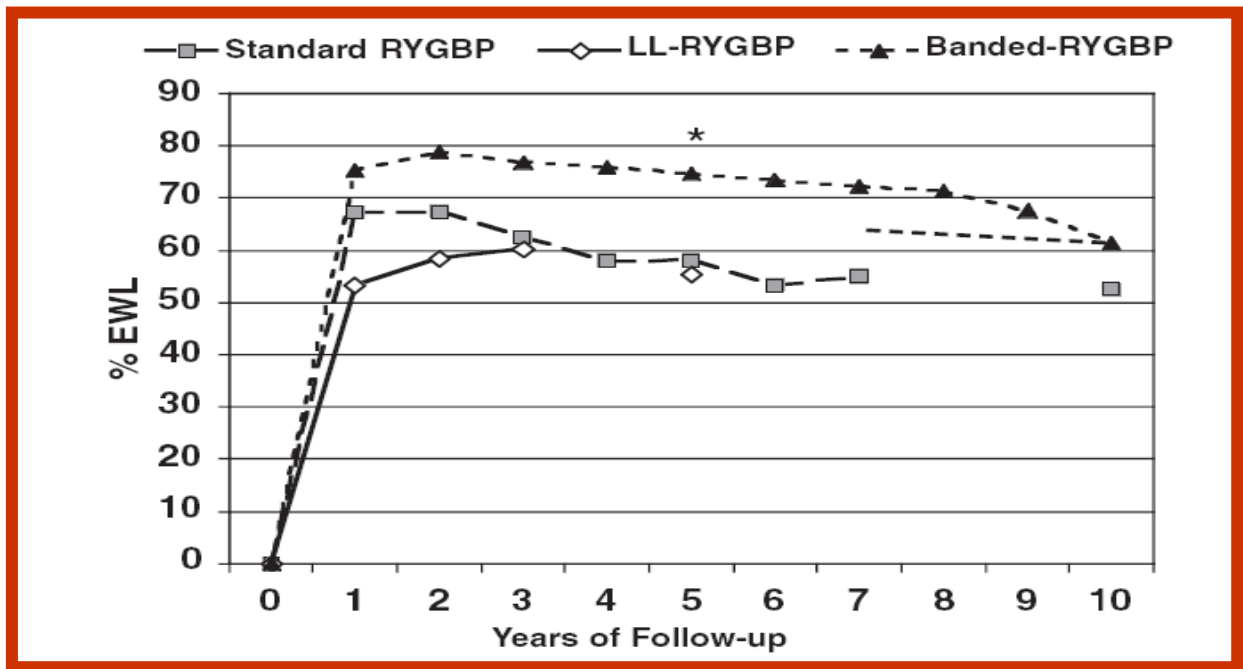

Banded Roux-en-Y GBP

Banded Gastric Bypass Operation For Obesity

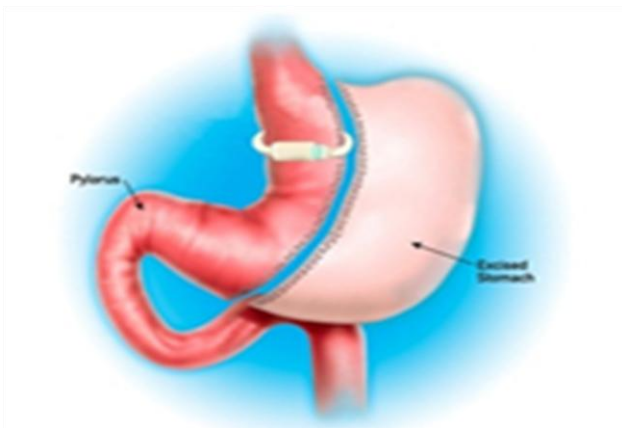

O'Brien in a systemic review reported better weight loss and weight loss maintenance with the banded Gastric Bypass.

PEWL for standard RYGBP and its two hybrid forms of LL-RYGBP and B-RYGBP

[O'Brien P.E: Systemic review of medium term-weight loss after bariatric surgery; Obesity Surgery:2006;16;1032-40]

Banded Sleeve Gastrectomy

Karcz WK; Sleeve Banded Gastrectomy using the GaBP Ring. Obesity Facts 2011;4:77-80

The Sleeve Gastrectomy is a gastropasty and banding the stoma in gastropasty operations have been adequately documented to increase weight loss and weight loss maintenance.
